Mr. Jaffe:

I couldn't believe that now you are forcing chickens to molt. I was raised on a farm and in later life had chickens of my own and never have I had salmonella poisoning. You should understand there is a time for this to happen and because of your decision on molting you are exposing million of Americans to salmonella poisoning.

You need to have farmers as part of the FDA decision making process because it is apparent that you do not know animals and how to keep the public safe from disease. We didn't have these problems years ago when we had people in charge that didn't make MONEY there only goal.

Please put the public concern number ONE and ban the forced molting of layer hens.

Thank you.
